NeuroVision AI

BRAIN MRI IMAGE ANALYSIS / RESEARCH REPORT

UNSIGNED | NON-DIAGNOSTIC

Report ref: 1170CC01955C

DEMONSTRATION DOCUMENT: Invented patient details and model scores are used solely to preview the report layout. No MRI was analyzed for this sample.

Patient & examination details

PATIENT NAME **Sample Patient**	PATIENT ID / CODE **DEMO-0001**	AGE **42 years**
SEX / GENDER (RECORDED) **Not provided**	MRI STUDY DATE **2026-11-03**	REFERRAL / REQUESTED BY **Not provided**
ORGANIZATION **NeuroVision AI | demonstration**	ANALYSIS GENERATED **03 Nov 2026 10:00 UTC**	REPORT STATUS **Research / unsigned**

01 EXAMINATION & CLINICAL INFORMATION

Examination: Brain MRI image - single uploaded PNG image; not a complete MRI study.

Sequence / view (user-entered): Not provided

Clinical indication (user-entered): Illustrative report layout; no patient evaluated.

02 AUTOMATED IMAGE CLASSIFICATION

HIGHEST-SCORING CONFIGURED CLASS

No tumor

MODEL SCORE

95.68%

Scores are algorithmic output values, **not** validated diagnostic probabilities, confidence levels, or a clinical interpretation.

RANK	CONFIGURED CLASS	SCORE DISTRIBUTION	VALUE
1	No tumor		95.68%
2	Meningioma		4.05%
3	Glioma		0.21%
4	Pituitary		0.06%

Provisional class labels: The displayed names (Glioma, Meningioma, No tumor and Pituitary) come from the application's configured mapping, **not** verified training class-index records. Names may be assigned to incorrect outputs; they must not be treated as a finding.

03 RADIOLOGICAL FINDINGS & IMPRESSION

Findings: Not assessed. The application classifies one exported image; it does not review the full MRI examination, anatomical structures, contrast series or clinical records.

Impression: No radiological diagnosis or exclusion of disease is provided. The model's highest score is a research output only. Interpretation of the complete study requires a qualified radiologist.

Clinical sign-off: Not performed. This is an **unsigned automated research report**, not an MRI report issued by a doctor. Do not use it for diagnosis, screening, triage or treatment.

04 TECHNICAL DETAILS & LIMITATIONS

Input: DEMONSTRATION_IMAGE.png | 512 x 512 pixels | PNG. Image resized to 224 x 224 RGB pixels for EfficientNetB0 classification.
